

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office

April 8, 1998 LB 1321

SENATOR JENSEN: That's true. However, there is a service that will be able to be done by the counties in that they will be able to do searches, they will be able to do...and get other information, I think, and get it in a moment's notice, whereas, right now in many cases, that was not available to them.

SENATOR WEHRBEIN: Okay, currently, a PROFS system exists for counties to communicate with each other, and the state, electronically through the use of UCC terminals. Will this system continue or will a similar system be installed on the new computers?

SENATOR JENSEN: It'll...it's whatever...it's whatever they'll work out and, again, this...this does not take effect until July of 1999, so there is time to work this out.

SENATOR WEHRBEIN: So if there is some bugs develop between now and then, that this should be,...

SENATOR JENSEN: Right.

SENATOR WEHRBEIN: ...even if we have to change the law?

SENATOR JENSEN: Yes, I think we can...we can address that at that time.

SENATOR WEHRBEIN: County clerks have been maintaining hard copies of filings since this system was instituted in 1965. According to state records retention schedules, UCC filings may only be disposed of two years after the filing has lapsed or is terminated. What will happen to the documents currently on file? Will these be transmitted to the Secretary of State?

SENATOR JENSEN: They may.

PRESIDENT ROBAK: One minute.

SENATOR JENSEN: I would think that that is something, again, that can be worked out between the state and the county as to...

SENATOR WEHRBEIN: All right, so that is subject to negotiation at this point?
